File sizes Adobe Photoshop (and Photoshop Elements) support Photoshop File Format (PSD) files. This format allows you to save your images in high resolution without compromising on file size. This also means you can save your original files and then reduce the size of the image in later steps. File types Adobe Photoshop and Photoshop Elements supports both common image types and file formats..jpg,.jpeg,.tif,.tiff and.png are common image types that are supported. To save a file as a RAW image in Photoshop, choose 'Save As…' and navigate to Photoshop Image Data > RAW. Image Editing Adobe Photoshop and Photoshop Elements share a similar user interface. To edit an image, start by opening it into Photoshop Elements, then working on it within the program. When you want to work on the same image in Photoshop, copy the file to your computer, log into Photoshop and work on it there. File size is important to keeping images in memory to ensure smooth performance with large images. A big file size will slow your computer down. The image processing in Photoshop Elements is much more efficient and therefore, your computer will work more smoothly. Adobe Photoshop and Photoshop Elements also let you reduce the file size of images to make them more manageable. Tip: Create a multi-page PDF file and then reduce the file size as necessary. You can save the PDF file and then cut and paste the pages from the PDF document into Photoshop Elements or Photoshop. Adjustments in the top tool bar are shared between the two programs. Adjustment layers are used to save time and reduce mistakes when adjusting images. Adjustments include levels, curves, black and white points, channels, color balance, brightness, saturation, hue, contrast, sharpness, noise, and a few others. Installing Adobe Photoshop Elements Depending on the version of Photoshop Elements you purchased, you may need to install the software. Former Lesser Known: The Van Buren Street Water Tower Water towers have been an integral part of our cities and communities for over 300 years. We have gone from simple cisterns to models created from the finest cast stone. We have gone from steel towers to ones constructed with concrete and cast stone. We have gone from open to covered to illuminated to automated. And we have gone from clean water to treatment. But one of the most enduring and iconic water towers is one that we don't talk about much anymore. Once there was a time when Van Buren Street Water Tower was not only the tallest water tower in Michigan but the tallest for miles around. The Van Buren Street Water Tower was built in 1883 and continued to serve until 2014. It was one of Detroit's first stand alone water towers, an abandoned relic of the city's early days, and the home of black bears. The Van Buren Street Water Tower, in words of little Bear Bottom, was built in 1883: "In 1883, a building was constructed on Van Buren Street of circular water storage tank, with an iron and brass stanchion tower. At the time, this was one of the tallest water towers in the state. But the water tower was abandoned shortly thereafter. Although the water tower continued to exist, its use was discontinued after the water department purchased a more modern water tower, which is still in service." In just a few short years after the tower was built, the rapidly growing city outgrew it. But, the tower still remains one of the oldest and tallest structures in Detroit. The open topped tower has a capacity of 83,000 gallons of water. The tower is 105 feet tall and the diameter at the top is 42 inches. The lights on top were installed in 1932 and have been used to advertise the city in the fall. The tower was built on top of a four-foot-thick sandstone wall. Water would be pumped into the top of the tank, providing a head of pressure, and the water would spill out into the surrounding area. In the early 1900s, it was common for the Van Buren Street Water Tower to regularly provide water to the city of Detroit with a total capacity of up to 80 million gallons a day. The water tower's owner and the water department leased the space in the tank to a family named Key. The Key family
